Experiences/Responsibilities Contributing to Qualifications for Office:

Being an active member of SCAPHON and APHON has always been integral component of my nursing career. I have been a member of both APHON and SCAPHON since 2003. Involvement in SCAPHON and APHON has provided opportunities to learn and network with mentors and colleagues, which in turn has challenged me to grow into the pediatric oncology nursing provider I am today.

Having served on SCAPHON board member for many years in different roles has allowed me the opportunity to learn and glean the intricacies of the SCAPHON board. Furthermore, I have seen firsthand, previous SCAPHON presidents model the importance of the presidency role in ensuring how all members of the SCAPHON board work together to provide our SCAPHON membership with meaningful opportunities for education, networking, mentorship, and lasting friendships.

State Why You Wish to Run for Office:

SCAPHON is an amazing organization with an incredible group of nurses who volunteer their time and expertise to serve our local Southern California pediatric hematology/oncology nursing colleagues. It has been an honor and privilege to be a part of SCAPHON and I believe I am at a point in my career where I am ready for the challenge and responsibility to serve as the next President Elect.

As SCAPHON President, I hope to lead the SCAPHON board to continue to provide innovative and relevant evidence-based education at our quarterly meetings and annual conferences, provide meaningful membership to our SCAPHON members, as well as research opportunities to pay it forward to our communities. This can only be successfully achieved through effective teamwork as I truly believe in the adage that "teamwork makes the dream work".

Thank you for your consideration in electing me for the next SCAPHON President-Elect position.
